

# (JO) BAASANLKHAM GURVANTAMIR

Email: [gurv0003@algonquinlive.com](mailto:gurv0003@algonquinlive.com) | GitHub: [jo-walker](https://github.com/jo-walker) | LinkedIn: [jo-tamir](https://www.linkedin.com/in/jo-tamir) | Portfolio: [jotamir.rocks](https://jotamir.rocks)

## EDUCATION

### Computer Programming Diploma

Sep 2023 - Aug 2025

Algonquin College, Ottawa, ON

- GPA: **3.93** | *Dean's Honour's List*
- Relevant courses: Network Programming, **Systems Analysis and Design**, Operating system/Scripting, Business Intelligence & Analysis/Machine Learning, Databases, Web Programming, Java (OOP, Design Patterns), Mobile Graphics Interface Development

### **Honours Bachelor's in Mathematics** (part-time)

2022 - Present

University of Ottawa, Ottawa, ON

- Relevant courses: Python, OOP Java, Digital Systems Logic, Linear Algebra, Discrete Math, Probability & Statistics, **Technical Report for Engineers**

## TECHNICAL SKILLS

- Languages: Java, SQL, C, C++, Python, JavaScript, Dart, TypeScript, HTML, CSS, Bash
- Tools & Technologies: **Git**, **GitHub**, Jenkins, Docker, Ubuntu, VMware, Linux/UNIX, Jira, REST, Packet Tracer, Wireshark, Android Studio, Postman, XAMPP, Tomcat, **.NET**, MS Office
- Frameworks: React.js, Node.JS, Flutter, Angular, Django, Tailwind, Flask, JSON, XML, YAML
- Development: Agile, SCRUM, MVC, Design patterns, OS concepts, testing, data mining, OOP
- Database: MySQL, SSMS, MongoDB, SQLite, Rapid Miner, Weka, MS Suite Power BI, Oracle SQL, MS Access, H2

## SOFT SKILLS

- Interpersonal skills: Initiative, creativity, “math-design” combo, formulative thinking, **Agile**, **SCRUM**, **team-oriented**

## ACADEMIC PROJECTS

### **E-commerce web app**

Apr 2024

- Engineered front-end development, focusing on user interaction and experience for admin dashboards, inventory management system.
- Implemented advanced features such as product filtering, real-time inventory updates, and user authentication using PHP, JavaScript, HTML, CSS, XAMPP, and MySQL.

### **uOcars—Electric Vehicle Journey Planner**, *uOttoHack 2024*

Feb 2024

- Optimized backend routing logic in Python and Flask, demonstrating strong problem-solving and technical skills.
- Integrated and maintained consistency and quality of APIs (Google Maps API) and Google Cloud Platform for dynamic data handling, improving system responsiveness and user engagement.

### **Food Waste Reduction Platform**, *Algonquin College*

Ongoing

- Developing a platform using Java/J2EE to redistribute surplus food, connecting retailers, consumers, and charitable organizations.
- Implementing secure user management and inventory control features, which increased user engagement.
- Applying design patterns for a scalable codebase and using version control Github.
- 

## WORK EXPERIENCE

### Full Stack Developer Intern

May 2023–Jul 2023

Ideabytes Inc, Hybrid-Ottawa, ON

- Reduced code failures by 20% through best practices in versioning, testing, and deployment.
- Led front-end development using Angular, Bootstrap, and Spring Boot, RESTful API, Tomcat, Postman to enhance user experience across multiple devices.
- Collaborated with front-end and back-end developers to integrate components with server-side logic.

### Software Team Coordinator

Sep 2023–Jan 2024

uORocketery, Ottawa, ON

- Implemented Docker containers to streamline development and testing environments.
- Developed a real-time data visualization web interface for a rocket ground station using C++, Rust, and Ubuntu/Linux.

### Co-founder, Designer

Feb 2020–Feb 2022

CyberPong Studio, Ulaanbaatar, Mongolia

- Spearheaded development of educational games with Unity and Construct 3.
- Initiated community game jams engaging over 100 developers.

## ACHIEVEMENTS & CERTIFICATIONS

- **1st Place, Hackathon** Hack the Hill 2023: <https://github.com/hackthefeed>

Developed a dynamic RSS feed, HackTheFeed.com, generator using TypeScript and Svelte with Fastify backend.

- **Certificates:**
  - DataCamp (Advanced SQL),
  - CS50 (Harvard),
  - IoT & Networking (Cisco Packet Tracer)

## PERSONAL DEVELOPMENT & INTERESTS

- Actively building a custom Redis-like database using C++, enhancing understanding of low-level programming and database management.
- Regular participation in hackathons and algorithm practices, keeping skills sharp and up-to-date.
